BR VARIO CYLINDRICAL BRUSH FLOOR MACHINE

BR VARIO

BR VARIO CYLINDRICAL BRUSH FLOOR MACHINE

Roller brush technology, a breakthrough cleaning alternative from the leader in Innovative Cleaning Systems

Imagine a compact, lightweight floor machine with 1000 rpm of cleaning power. Even better, imagine a machine that utilizes cutting-edge brush technology to tackle floor surfaces from tile and cement to paver bricks, raised rubber disc, quarry tile, and other challenging applications. Add a solution tank, collapsible handle, and contact pressure six times greater than that of a single disc machine and you have the BR Vario, the latest in industry floor machine technology.

A unique feature of the Vario is that it can strip and scrub without the normal slinging of water seen in traditional rotary floor machines. The BR Vario provides unmatched speed and efficiency for large areas, while allowing close edge cleaning along walls and other obstacles. The Vario's handle turns 90 degrees allowing the operator two-dimensional cleaning performance in all directions: left, right, forwards, and backwards.

Professional performance

Equipped with the proper brush or pad, the Vario can be used on ceramic tile and other high polish surfaces safely and effectively. The on-board solution tank allows the operator to dispense cleaning solution during operation.

Two-dimensional cleaning

The handle of the BR Vario can be unlocked, pivoted up to 90 degrees, and re-locked, allowing cleaning in all directions. This allows for better performance in edge cleaning and in getting close to fixed obstacles.

Convenient
The unit folds down for easy transport and storage.

Aggressive cleaning

Increased contact pressure and 1000 rpm are ideal for the challenging environments of kitchens, locker rooms, and garages. The Vario's twin brushes attack irregular surfaces with a vengeance, penetrating cracks and crevices for deep-down cleaning. An optional extra weight kit is available for added head weight.

Cylindrical pads

The BR units can be fitted with a unique roller shaft that accepts individual pads. Each pad can be changed if damaged without the need to replace an entire single pad.

Cylindrical brushes

A variety of cylindrical brushes are available for high performance on structured flooring.

PRODUCT SPECIFICATIONS

MODEL	CATALOG NUMBER	CLEANING PATH	COUNTER ROTATING BRUSHES*	BRUSH SPEED	SOLUTION TANK	OPERATING DIRECTION	POWER**	WEIGHT	DIMENSIONS (WITHOUT HANDLE)
BR VARIO	97605	16"	Two	1000 RPM	0.8 gal. / 3 liters	4-way	115V	66 lbs.	20" X 19" X 6.7"

*Please note that unit does not include brushes or pad shafts. See below.
**This unit comes standard with a stub cord. A customer-provided extension cord is required (14-3 gauge recommended).
