LR 32

28" AND 32" LONG-RANGE FLOORKEEPERS

State-of-the-art digital controls, with pioneering technology for the industry

Designed with input from retailers and contract cleaners by the leader in innovative cleaning systems, the new Long-Range Series of Floorkeepers are available in 28" and 32" models. The Long-Range includes breakthrough digital controls that outmatch, out-feature, and outperform units with analog control technology. A modular one-piece control board simplifies maintenance while providing the user with a digital read-out on component operation, battery level, and troubleshooting assistance.

Both units offer 20-gallon solution and recovery tanks, easy-access tanks for cleaning, quick-lift hood for maintenance, and come complete with batteries, charger, and pad holders. The addition of a maintenance-free transaxle reflects Tornado's commitment to making after-purchase service a priority. The LR Series is at home in the toughest of environments thanks to a steel unibody frame covered with a double-wall rotationally-molded lower body.

State-of-the-art
Pioneering technology such as a LCD (liquid crystal display) read-out makes the LR Series truly operator friendly.

Efficient, Smart Design
A modular control board is the nerve center of the LR Series. It is designed for easy service and eliminates large amounts of wiring and electrical components found in units built with older technology.

Easy-fill solution tank
The solution tank is accessed simply by raising the lid of the machine. The tank holds 20-gallons of water and cleaning agent.

Designed to protect your investment
The recovery tank float prevents overfilling and is easily removed for cleaning.

Service-friendly
The lid is easily lifted for solution tank and battery access. Because there is no need to drain the solution or recovery tanks, the user has ready access to the batteries, float, tanks, and vac motor.

Easy-access recovery tank
The drain hose at the rear of the machine allows rapid evacuation of the 20-gallon recovery tank. The drain plate can be quickly removed for cleaning the tank.

PRODUCT SPECIFICATIONS

MODEL	CATALOG NUMBER	PROGRAMMABLE CONTROL SYSTEM	CLEANING PATH	BRUSH/PAD SIZE	BRUSH/PAD SPEED	PAD PRESSURE	BRUSH MOTORS	RECOVERY CAPACITY	SOLUTION CAPACITY
