

**Built to rigorous professional standards**

The Profi™ Air Mover/Dryer combines innovation, rugged construction, and common-sense design in a compact package. It is the answer for drying carpets, upholstery, or hard floors.

This go-anywhere unit is a durable, rotationally-molded dryer with sensible features and unmatched professional performance. The machine is perfect for use after fire, flood, or other water damage as well as for drying wet floors during rainy or snowy seasons. The unit is also appropriate for general air circulation in almost any facility.

The motor is mounted at four points instead of a typical three-point mounting. This design serves to reduce noise and vibration as well as increase the machine's life. A three-speed switch permits airflow selection of 1600, 2000, and 2500 cfm. Airflow may be directed at three angles (0, 30, and 90-degrees), and the units are stackable for easy storage.

**CARRYING HANDLE AND CORD WRAP**

A handle is molded-in for easy transport. The power cord can be conveniently stored when the unit is not in use.

**STACKABLE STORAGE**

Space-efficient storage is simple in corners or closets thanks to molded-in stacking ribs.

**THREE-ANGLE ADJUSTMENT**

Angle adjustment is a built-in feature of the unit. The unit's contours have been designed to permit operation at three angles. Screw in height-adjustment feet, which often get bent or lost, are eliminated. Four rubber shoes absorb vibration and provide stability. Place the unit flat for drying floors or at a 30 or 90-degree angle for drying walls or general air circulation.

PRODUCT SPECIFICATIONS	
MODEL	PF8805
CATALOG NUMBER	68805
POWER	115V / 60Hz
SPEEDS	3
AIR-FLOW	1600-2000-2500 cfm
AIR-FLOW DIRECTION	0° / 30° / 90°
MOTOR	.5 HP
MOTOR RATING	Continuous Duty
HOUSING	Polyethylene
HANDLE	Molded In
STACKABLE	Yes
POWER CORD	25' (18/3)
SIZE (H X W X D)	18" X 14" X 20.5"
WEIGHT	30 LBS
